

# Volvence, Evolving Emergence

Volvence is dedicated to creating the first nurturing digital life form through a new paradigm of general intelligence. It possesses a "biological brain" and a "body," featuring a brainstem (governing health), a limbic system (governing emotions), a cortex (governing tasks), and a hormonal system (governing the body). This is fundamentally different from current companion robots, which are essentially chat software.

Volvence will launch a companion product (AI Bestie, App + hardware) targeted at urban women aged 20-45 for companionship and socialization. At the same time, it can also provide Soul-as-a-Service APIs to business clients and partners. Volvence's vision is to promote companionship as the next-generation gateway for digital avatars, social interaction, and commerce.

The Volvence founding team consists of serial achievers in business, technology, and academia. Founder Jiangbo Zhao holds a Bachelor's degree in Computer Science from **Peking University** and an MBA from Guanghua School of Management. He has held senior positions at HP, Alibaba, and Tencent, and was the founder of the gaming social platform Nice-Hand with commercial exit. The Co-founder and Chief Scientist is a Ph.D. in Machine Learning from **Carnegie Mellon University (CMU) and a world-renowned scholar in the field of Reinforcement Learning**. Additionally, the **Assistant Director of the Tsinghua Laboratory of Brain and Intelligence** serves as a Scientific Advisor.

Volvence (进化涌现)致力于通过通用智能的新范式，打造第一个养成式数字生命。它有“生物脑”和“身体”，有脑干（管健康）、有边缘系统（管感情）、有皮层（管事儿），还有激素分泌系统（管身体），与当下的陪伴机器人（其实是聊天软件）有本质的不同。

Volvence 将推出一款面向都市 20-40 岁女性的陪伴产品（ai 闺蜜，app+实体硬件），用于陪伴和社交。同时也可为商业客户和伙伴提供灵魂即服务 API。Volvence 愿景是致力推动陪伴成为数字分身、社交和商业的下一代入口。

Volvence 创始团队由商业、技术和学术上的连续成功者组成，创始人赵江波毕业于北京大学计算机系本科和光华 MBA，在惠普阿里和腾讯等担任过高级岗位，游戏社交平台好牌创始人成功商业化退出。联合创始人和首席科学家是卡内基梅隆大学（CMU）机器学习博士，强化学习领域的世界知名学者。同时，清华脑与智能实验室助理主任担任科学顾问。
